Topsector ICT mkb-call voor publiek-private samenwerking 2025

Kernvereisten

- Het onderzoek past binnen de *KIA Digitalisering*
- Het onderzoek past binnen de prioritaire digitale sleuteltechnologieën uit de Nationale Technologie Strategie (NTS): 'Cybersecurity Technologies' of 'AI/Data'
- Het consortium bestaat uit tenminste één onderneming met winstoogmerk en één onderzoeksorganisatie (gezamenlijk rekening en risico)
- Het project omvat industrieel onderzoek
- De hoofdaanvrager is een in Nederland gevestigde mkb-onderneming
- Het project duurt maximaal 2 jaar
- Per project mag het mkb (gezamenlijk) in totaal aanspraak maken op maximaal €300.000 PPS-middelen
- Per project mogen de onderzoeksorganisatie(s) in totaal aanspraak maken op maximaal €150.000 PPS- middelen

In deze mkb-call stelt Topsector ICT 4 miljoen PPS-i middelen beschikbaar

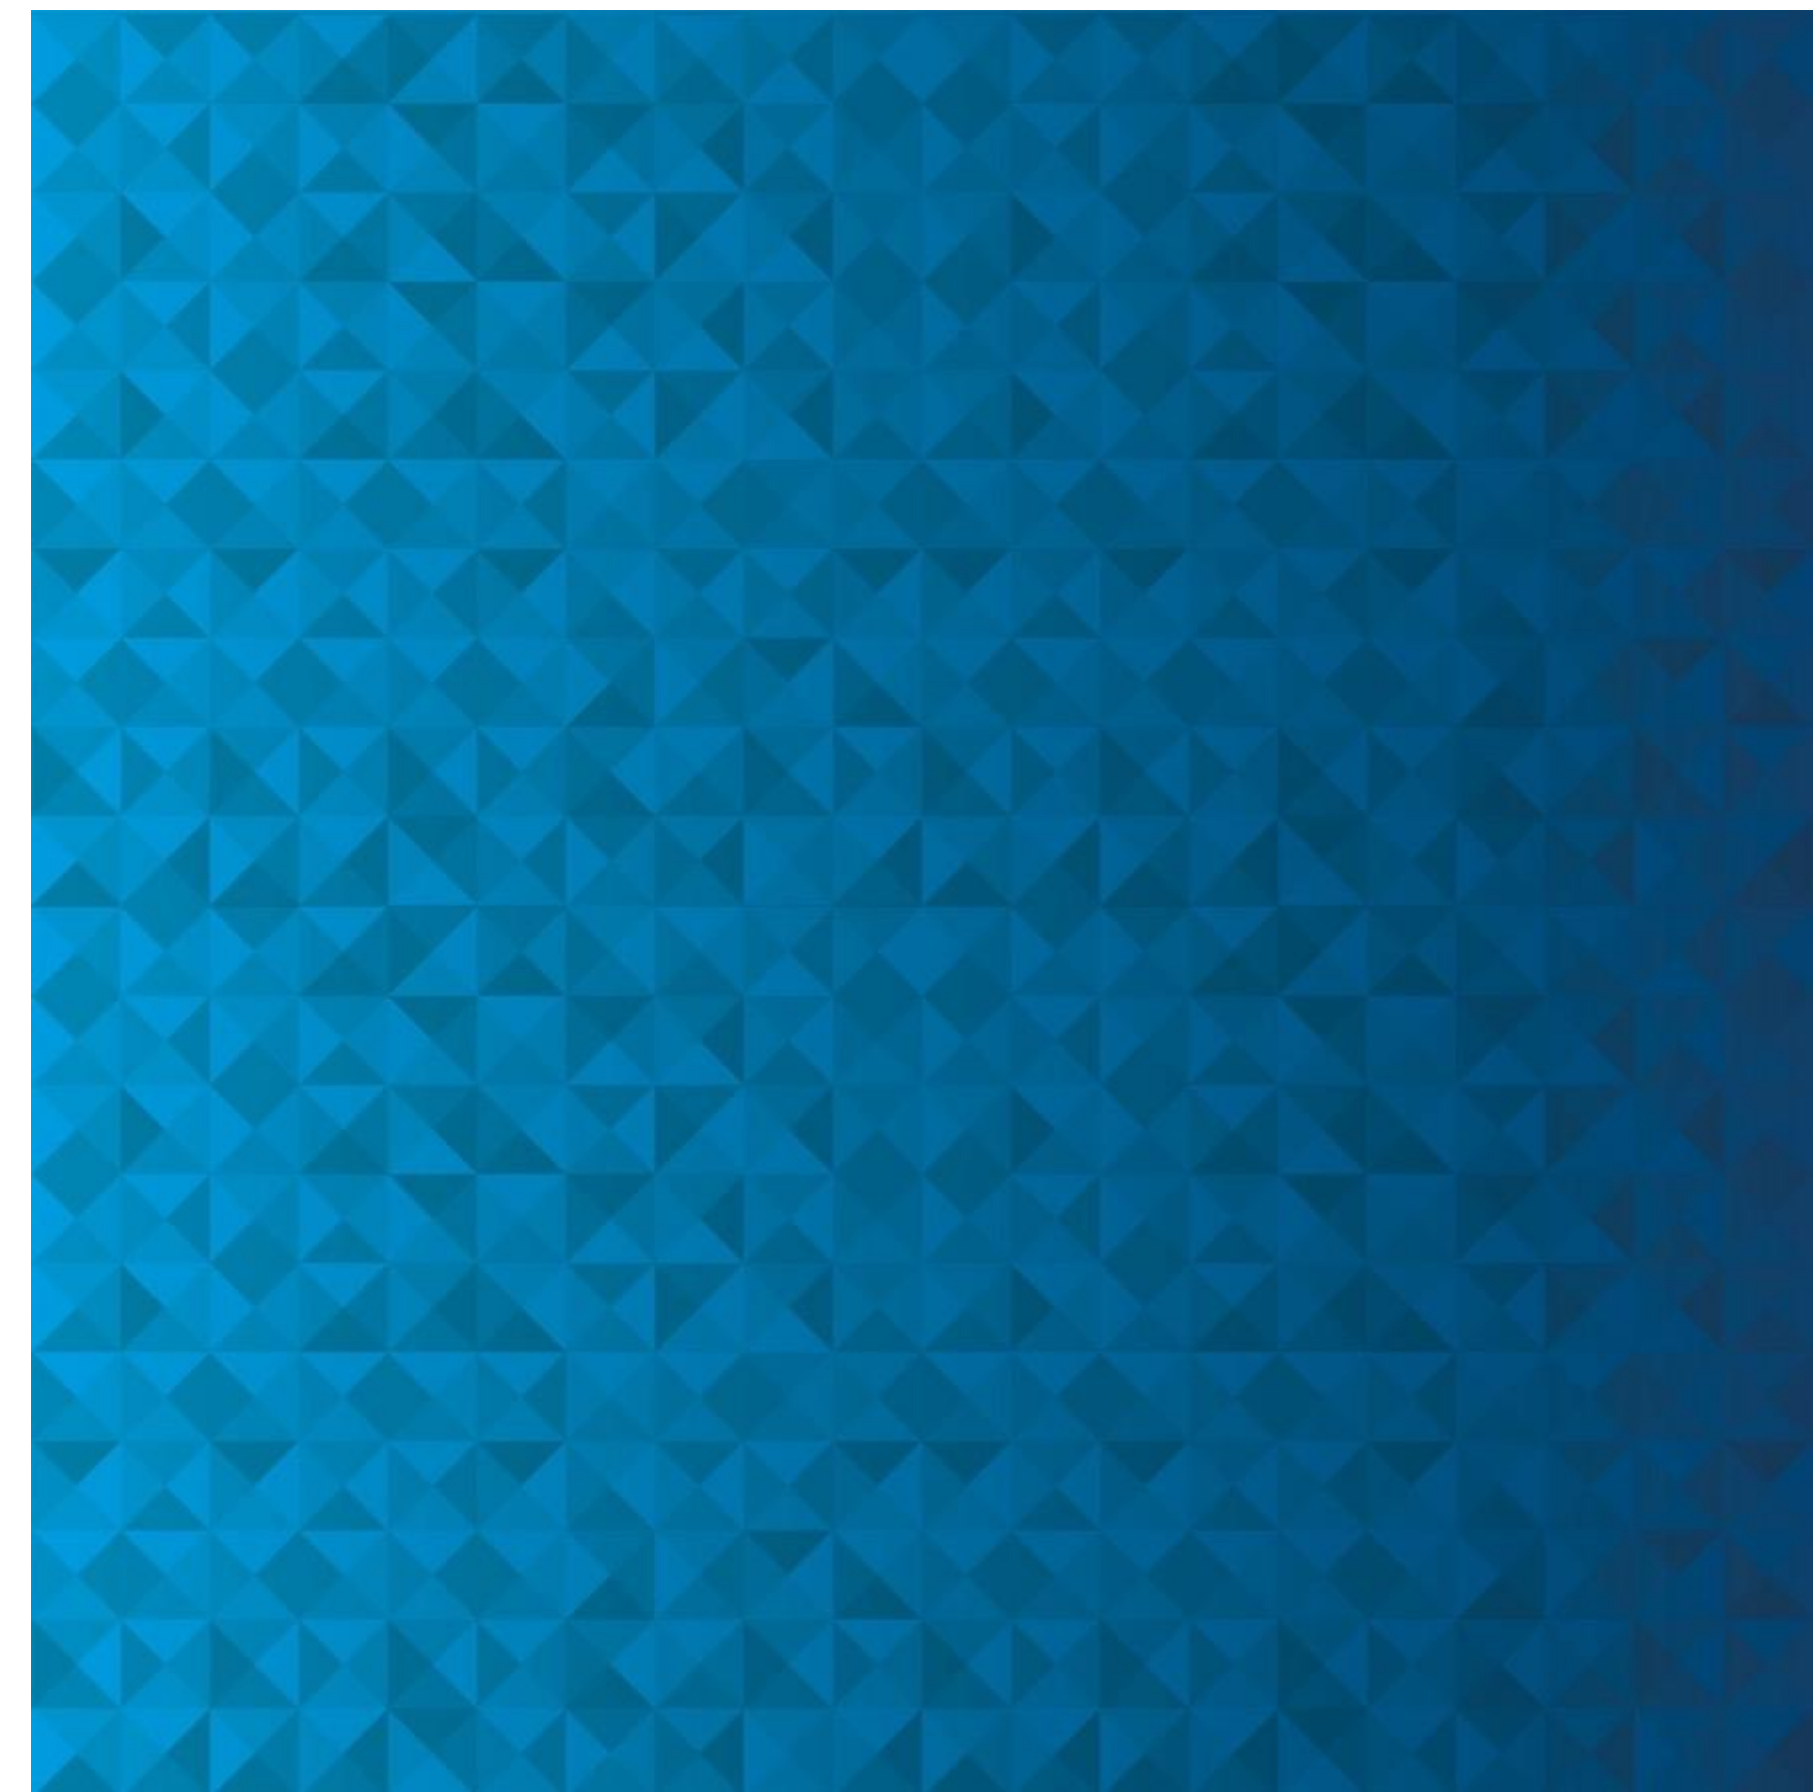

Topsector ICT mkb-call voor publiek-private samenwerking 2025

Procedure en indieningsdata

- Vooraanvraag formulier voor 11 september 2025 18:00 uur
(mkb verklaring, verklaring geen onderneming in moeilijkheden)
 - Toets op passendheid binnen mkb-call (voorwaarden en criteria)
 - Advies over indienen van een volledige aanvraag
- Volledige aanvraag voor 14 november 2025 18:00 uur
(Aanvraagformulier, projectplan, begrotingsformulier, steunbrieven (commitment), consortium agreement)
 - Toets op call-voorwaarden en beoordeling door onafhankelijke evaluatiecommissie
 - Bijdrage aan KIA Digitalisering, kwaliteit van onderzoek en innovatie, relevantie en impact en haalbaarheid
- Honorering/Afwijzing rond eind februari 2026

Webinars

- Vooraanvraag webinar 28 augustus 2025 11:00 uur
- Volledige aanvraag webinar voor 16 oktober 2025 11:00 uur

20 juni 2025

2024 - 2027

TRADITIONAL INTERNET

Flat, Vulnerable Network

SCION

Multi-Path Routing, Verified Endpoints
Sovereign Data Paths

SCION by Varity Mark Karsch m.karsch@varity.nl
(SCALABILITY, CONTROL, AND ISOLATION ON NEXT-GENERATION NETWORKS)

USE MODELS

- ▶ Secure communications (Government, Military and diplomatic)
- ▶ Financial services (Banking, stock exchanges & trading platforms) (example: Swiss Secure Finance Network)
- ▶ Healthcare: Secure transmission of personal data (can be voice & data sharing)
- ▶ Enterprise networking: Control over data paths and a more secure and resilient alternative to VPN and DDOS protection

What are we looking for?

- ▶ BeNeLux and European use cases
- ▶ Conversations that have a sovereignty angle
- ▶ Schools and universities that need help with correctly handling/sharing their research data
- ▶ Government and public institutions who are re-evaluating that data is being handled

→ Yes it is up and running and we have proven business cases!

Wij hebben

Wij weten wat de uitdagingen van organisaties zijn op het gebied van digital, en wij weten hoe ze nieuwe technologieën kunnen implementeren op een manier dat echt werkt.

Kennis van de behoeftes van organisaties

Ervaring met het uitvoering van digitale oplossingen en transformatie

Wij zoeken

Wij werken met AI, maar denken dat wij kunnen veel leren van gespecialiseerde onderzoeksorganisaties op dit gebied.

1

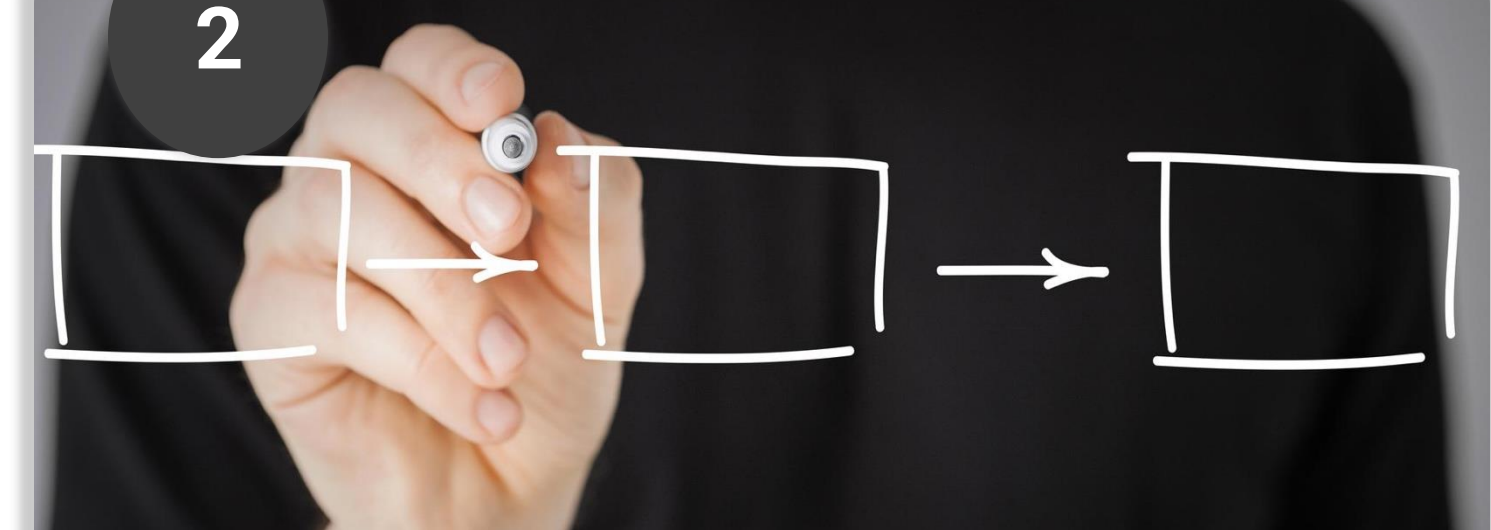

Onderzoeksorganisaties met kennis van AI

UNIVERSITY OF AMSTERDAM
Roeterseiland Impact

2

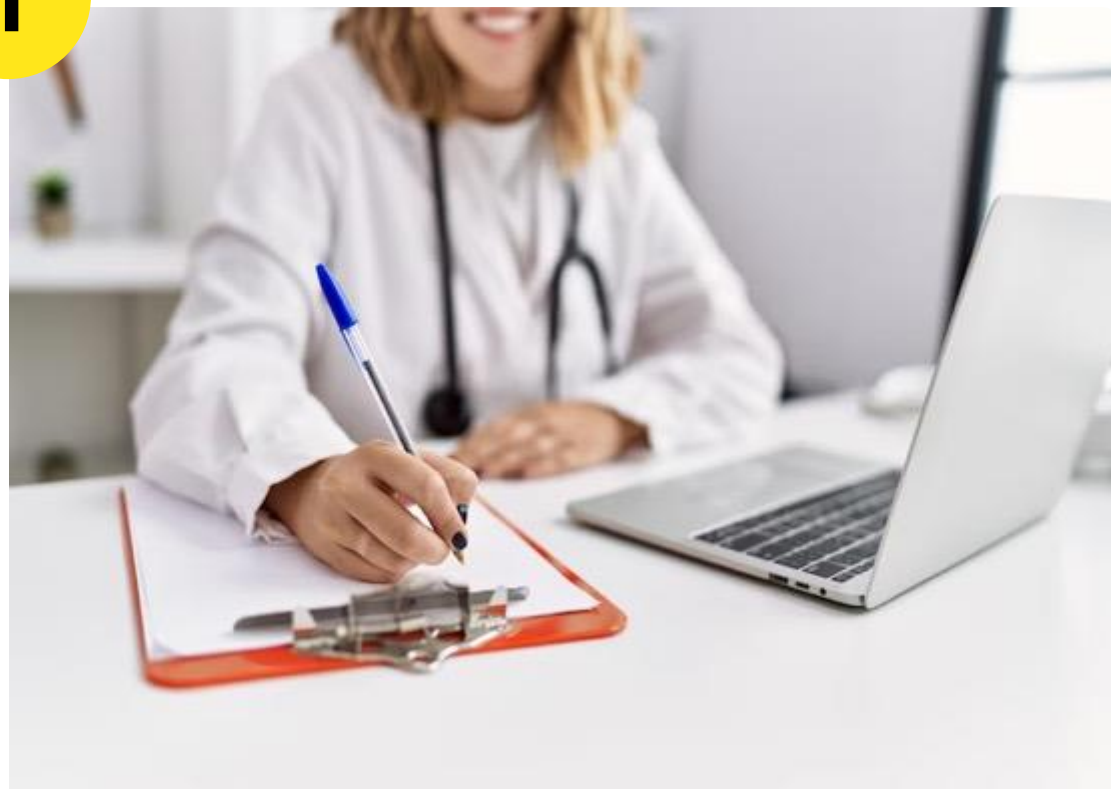

Samenwerking om AI te gebruiken voor complexe analytische use-cases

Samenwerking om AI te kunnen gebruiken in complexe analytische vraagstukken

AI voor het ondersteunen van Medical Writers

1

We werden benaderd door een klant in Medical Writing om processen te helpen optimaliseren

2

We begrepen dat medisch schrijven een proces is met een zeer zwaar handmatig onderzoekselement

3

De cliënt heeft een uitgebreide basis van hoogwaardige medische teksten die kunnen worden gebruikt om een model te trainen in het gebied van Medical Writing

Doel

4

Een AI-model ter ondersteuning van het onderzoek en de productie van hoogwaardige medische teksten

DIGITALISERING

STRATEGISCHE
AGENDA
2024 - 2027

Wij zijn WEM, een Nederlands no-code platform waarmee organisaties zélf digitale oplossingen kunnen bouwen – zonder te hoeven programmeren.

Denk aan:

- slimme web applicaties
- AI-agents die werkprocessen automatiseren
- en integraties met andere systemen

Wat normaal maanden development kost, realiseren je nu in weken – tot 10x sneller en vaak voor 10% van de kosten. Van snelle MVP tot kernsysteem met duizenden gebruikers

Binnen dit programma kunnen wij ondersteunen op twee manieren:

- 1. Onderzoek:** WEM maakt het mogelijk om onderzoeksresultaten razendsnel te vertalen naar werkende prototypes. Zonder te programmeren. Zo kunnen AI-ideeën direct getest en gevalideerd worden in realistische toepassingen – sneller én met gebruikersfeedback.
- 2. Implementatie:** Met WEM bouwen we in weken wat anders maanden duurt. We realiseren alles van een eerste MVP tot een volledige kernapplicatie, inclusief integraties, logica en interface.

In de afgelopen jaren bouwden we met WEM uiteenlopende toepassingen voor de MKB en sectoren zoals zorg, logistiek, overheid en finance:

- een AI-gedreven retourportaal dat automatisch beslissingen neemt over 50% van alle cases
- interne AI-assistenten die e-mails verwerken en acties aan workflows koppelen
- een planningssysteem voor CO₂-neutrale logistiek
- een klantportaal dat bedrijfsprocessen automatiseert zonder programmeerkennis
- en selfservice-applicaties voor gemeentelijke dienstverlening

Samenwerken?

Deze impactgedreven partners zoeken wij:

- kennisinstellingen die AI of data-onderzoek willen toepassen in werkende software
- bedrijven en organisaties met processen die vragen om slimmere automatisering
- andere MKB-partijen die versnelling zoeken in hun project

Wij brengen snelheid, bouwkracht en ervaring mee – én een platform dat laagdrempelige en snelle innovatie toegankelijk maakt.

Benieuwd naar wat er voor jou mogelijk is? Kom gezellig langs!

Jan Dekker – WEM No-Code

Boost your innovation, accelerate results, learn together in the AI-Lab approach!

Matchmaking event voor de call MKB, Topsector ICT, 20 June '25
Hans Meeske, Holland Innovative

Get ready for AI! Accelerate together!

- Quick-scan of digital maturity
- Team capability assessment
- AI Opportunity Mapping workshop
- Quick-scan of current processes
- Identify pain points and gains

- Select high-impact opportunities
- Define KPI's & Success metrics
- Assess resource requirements
- Create implementation timeline
- Build team capabilities

- Run some AI Design Sprint(s)
- Create small AI pilot projects
- Test and validate solutions
- Build team capabilities
- Check Ethics & (EU) Compliance

- Implement successful AI pilots
- Measure and optimize results
- Document best practices
- Share learnings with others
- Expand team training

- Monitor performance
- Capture new insights & opportunities
- Share success stories
- Refine your AI strategy
- ... repeat process 1 - 5

Artificial Intelligence For Executives

Unlock AI's potential for business advantage and lead confidently

Turn AI from a business challenge into your competitive advantage. As AI transforms industries and redefines business models, executives need clarity on how to harness AI's full potential. Our executive-focused workshop cuts through the complexity, giving you the strategic insights and practical understanding to lead with confidence.

Workshop
In just 4 hours, this intensive morning workshop helps C-level executives and senior leaders understand AI's strategic implications and opportunities. Through relevant, practical demonstrations and an interactive, evidence-based approach, participants gain firsthand experience of AI and its potential as a capability.

Key benefits
• Clear strategic understanding of AI's capabilities, its transformation potential and business impact without technical jargon
• Hands-on experience of AI's capabilities and its potential through interactive, evidence-based demonstrations
• Practical, actionable insights into AI's strategic implications and opportunities
• Hands-on experience of AI's capabilities and its potential as a capability

Discover AI's Potential
Designed specifically for busy C-level executives, this workshop cuts through the complexity of AI to provide you with the practical insights you need to identify AI's potential in your organization. You'll learn what you need to know to identify AI's potential in your organization, and how to leverage AI's capabilities to drive business growth.

Key benefits
• Gain a clear understanding of AI's potential in your organization
• Identify AI's strategic implications and opportunities
• Gain practical, actionable insights into AI's potential in your organization
• Hands-on experience of AI's capabilities and its potential as a capability

Discover what's possible
Designed for busy leaders, this workshop provides you with the practical insights you need to identify AI's potential in your organization. You'll learn what you need to know to identify AI's potential in your organization, and how to leverage AI's capabilities to drive business growth.

Key benefits
• Gain a clear understanding of AI's potential in your organization
• Identify AI's strategic implications and opportunities
• Gain practical, actionable insights into AI's potential in your organization
• Hands-on experience of AI's capabilities and its potential as a capability

AI Productivity Accelerator

From basic commands to breakthrough results, learn how to accelerate your productivity with AI prompt engineering skills and make AI work for you.

In today's rapidly evolving AI landscape, business leaders and project managers face the challenge of effectively implementing AI across their organizations. The AI Productivity Accelerator emerges as the essential program for transforming how you and your team can improve their interaction and get the best output with AI technologies like ChatGPT and Copilot to drive measurable business results.

The Business Challenge
Organizations struggle to harness the full potential of AI. They often lack the necessary skills and knowledge to effectively interact with AI, leading to inefficient and costly processes. The AI Productivity Accelerator provides the essential training and support needed to overcome these challenges and unlock the full potential of AI.

Key benefits
• Gain a clear understanding of AI's potential in your organization
• Identify AI's strategic implications and opportunities
• Gain practical, actionable insights into AI's potential in your organization
• Hands-on experience of AI's capabilities and its potential as a capability

Business-First Approach
Our program is designed to be practical and actionable, focusing on the real-world challenges and opportunities of AI. We provide you with the tools and techniques you need to get started today, so you can see the value of AI in your organization from the very beginning.

Key benefits
• Gain a clear understanding of AI's potential in your organization
• Identify AI's strategic implications and opportunities
• Gain practical, actionable insights into AI's potential in your organization
• Hands-on experience of AI's capabilities and its potential as a capability

SWAT @ Centrum Wiskunde & Informatica

- Software Analysis & Transformation (SWAT)
 - at **CWI**: dutch national research institute mathematics and computer science
- “Source code is our middle name”
 - better tools to **understand software**
 - better tools to **build software**
 - **Complexity** is the biggest problem in software!

Contact:
Tijs van der Storm
storm@cwi.nl

Centrum Wiskunde & Informatica

Software Analysis & Transformation (SWAT)

- Core expertise of the SWAT group
 - language engineering & design, DSLs, MDD, PL (“forward”)
 - source code analysis, static analysis, repository analysis (“reverse”)
- Core platform: Rascal (<http://www.rascal-mpl.org>)
 - comprehensive meta programming system to accelerate the above
 - language workbench: prototype DSL + IDE in weeks, not months
 - frontends for many languages: Java, C/C++, PHP, ...

Centrum Wiskunde & Informatica

<https://www.rascal-mpl.org/>

R A S C A L

Interested in projects related to:

- Building (organization-specific) Domain-Specific Languages (DSLs)
- Software renovation and rejuvenation projects (e.g. “legacy” software)
- Mining software repositories (metrics, visualization, etc.)
- Developing language front-ends to support source code analysis.
- Source code analysis for security

AI and Data Integration - Cybersecurity - Data Integrity for Regulated Environments

Hans Christiaan de Raad – OpenNovations

Challenge: Many organizations waste time and budget reinventing AI infrastructure (Kubernetes, DICOM pipelines) that often lacks standardized security, data integrity, or compliance.

Our insight: In sectors like healthcare, pharma, finance, AI impacts can be life-or-death. This demands:

- Full traceability and data lineage
- Robust privacy-by-design and cybersecurity protection
- Compliance with GDPR / ISO / EMA / OECD standards

Our Goal: Co-develop an open-source reference stack—containerized, secure, auditable—with complete documentation to simplify deployment, ensure responsible data handling, and protect against cyber and integrity risks.

 Let's connect if you're championing secure, production-grade AI in regulated contexts.

Approach and Value - Reference Stack

Docker-based pipeline: Airflow orchestration, DICOM/Orthanc data epoxy, Kafka for secure messaging, Postgres storage with integrity checks, plus explainability tools.

Cybersecurity and Data Integrity Features:

- Logging, audit trails, and immutable data hashes
- End-to-end encryption for data at rest and in transit
- Privacy-enhancing modules (anonymization, access control)

TRL 4–6 Roadmap (aligned with TopSector ICT definitions)

TRL 4: Lab validation of modular components, including security and integrity checks

- TRL 5: Integration in a simulated clinical environment with realistic cybersecurity constraints
- TRL 6: Pilot deployment in a hospital or institutional setting, evaluating real workflows, cyber resilience, privacy impact, and data lineage robustness

Deliverables:

- Open-source repository: Stack code + test scripts + security/compliance policies
- Jupyter notebooks featuring pilot insights and secure pipelines
- Workshop materials for hands-on education and cyber/data governance training

OpenNovations

Call to Action –
We need you!

Research / Knowledge Partners (universities, hospitals): to co-pilot secure environments, validate data security, and satisfy PPS / SIDN requirements.

Infrastructure Partners (MSPs, data centers): to build hardened on-prem hosting with strong cybersecurity and compliance frameworks.

Domain Experts (healthcare, finance, energy): to define realistic secure use cases and integrity-sensitive workflows.

SME Data Deal Enabler.

Herstel de regie van hospitality-mkb met datagedreven samenwerking.

Datum:

June 20th 2025

Gepresenteerd door:

Tijl van Eck (Abykys)

Doel: MKB-bedrijven in hospitality realtime stuurinformatie geven en hen helpen hun eigen verdienmodel te versterken, zonder afhankelijk te zijn van grote platformen.

Enjoying the **value of data**

Sectorproblemen en onze oplossing

Uitdagingen in de sector:

- Margedruk en stijgend aantal faillissementen
- Fragmentatie van data
- Platformafhankelijkheid en gebrek aan samenwerking

Oplossing:

- Hospitality Data Deals: juridisch en technisch veilige datadeling via AMdEX
- Toepassingen: Realtime winstinzichten, KPI-framework, benchmarking
- Voordelen: Meer regie, hogere marges, minder faillissementen

Impact

Datagestuurde beslissingen geven hospitality-mkb'ers grip op marge, risico en toekomst – veilig, schaalbaar en onder eigen regie.

Waarom deze aanpak wérkt

Innovatie:

- Gericht op hotel/restaurant-combinaties, niet op silo-tools.
- Gebaseerd op veilige, decentrale technologie (AMdEX) — geen nieuw platform.
- Combineert data uit o.a. MEWS, Lightspeed, EXACT, Zenchef.

Consortium:

Partner	Rol
Garde Hotels	Key innovation partner
QL Lodging	Pilotgroep van hotels
Abykys	Governance & tech lead
UvA & Hogeschool Den Haag	Onderzoek & validatie

Geïnteresseerd? Laten we samenwerken.

Wil jij investeren in een sterkere hospitality MKB?

Open-source Energy Maps and Simulating Tools

Typical questions:

- Is my energy system well dimensioned?
- Are all energy carriers in balance at all times?
- How do different energy carriers interact?
- (Over)load of the distribution or transport infrastructure?
- What are the CO₂ emissions per scenario?
- What are the effects of adding storage in the system?

ESDL: Uniform language to describe an energy system:

- Profiles for demand and inflexible production
- Conversion: Power, efficiency
- Storage: Capacity, (dis)charge power
- Transport: Capacities for the infrastructure
